

REMARKS/ARGUMENTS

The specification and claim 16 have been amended to address editorial issues. Applicants respectfully submit that the changes to paragraphs [0055], [0062] and [0076], and claim 16, are supported by the word "PD153035" and paragraph [0055]. That is, one skilled in the art fully understands that "PD153035" means "[4-(3-bromophenyl)amino]-6,7-dimethoxyquinazoline". This fact is confirmed by searching Web sites, and also by referring to the description "... *In one embodiment of the invention, the tyrosine kinase inhibitor is a quinazoline derivative, especially an anilino quinazoline ... Calbiochem catalogue number 435302; PD153035 (4-[3-bromophenyl) amino-6, 7-dimethoxyquinazoline, ...*" in W02004/069232.

In response to the Office Action mailed March 14, 2008, Applicants hereby provisionally elect Group I, with traverse. Applicants respectfully submit that claims 1-7 read on the elected invention.

Applicants respectfully traverse the restriction requirement, since it is believed that several of the Groups identified by the PTO are sufficiently related that a thorough and complete search for one Group would necessarily include a thorough and complete search for prior art relevant to one or more of the other Groups. If the PTO stands by the current restriction, Applicants would be forced to file 42 separate divisional applications to seek examination of 16 claims. How the PTO believes that this would advance the goal of compact prosecution or examination efficiency defies logic.

In light of all the foregoing, the PTO is requested to withdraw the restriction requirement at least with respect to some of the other 42 Groups identified in the Office Action.

Should the Examiner have any questions concerning this paper, she is requested to telephone Applicants' undersigned representative.

The Commissioner is hereby authorized to charge any additional fees associated with this communication or credit any overpayment to Deposit Account No. 50-1446.

Respectfully submitted,

Stephen P. Burr
